NG 3930 B3XF

VERY GOOD FIBER QUALITY | HEAT & DROUGHT TOLERANCE

PROVEN DRYLAND PERFORMANCE.

- Excellent Emergence
- Widely Adapted Across Multiple Soil Types
- Very Stormproof
- Easy To Manage
- Recovers Well From Weather Events
- Easy To Harvest

NG 3930 B3XF is a widely adapted variety bred for Southwest growers. Whether it's on light water or planted later on dryland acres, **NG 3930 B3XF** handles the stress of West Texas summers very well. Very low maintenance and has a unique ability to recover well from tough weather events. Very good fiber package with excellent staple length.

20+ LBS MORE PER ACRE THAN THE COMPETITION!

Gross Dollar per Acre calculated by lint yield x loan value. Value calculation based on $0.52/lb (+/-) discounts/premiums from the 2019 USDA Loan Chart.

All data sources are from 2019 Southern High Plains Replicated Agronomic Cotton Evaluation (RACE) Trial Results performed by the Texas A&M AgriLife Extension Service *(http://cotton.tamu.edu/)* and the 2019 Oklahoma Cotton Official Variety Tests (OVT) performed by the Oklahoma State University Department of Plant and Soil Sciences *(http://cotton.okstate.edu)*.

Dryland Trials only. n=6. Competitive check is DPL 1646 B2XF.

Individual results may vary, and performance may vary from location to location and from year to year.
These results may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

B.t. products may not yet be registered in all states. Check with your representative for the registration status in your state. Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG.

ALWAYS READ AND FOLLOW DIRECTIONS FOR USE ON PESTICIDE LABELING. IT IS A VIOLATION OF FEDERAL AND STATE LAW to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with cotton with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with cotton with XtendFlex® Technology. **Cotton with XtendFlex® Technology** contains genes that confer tolerance to glyphosate, dicamba and glufosinate. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your dealer or refer to the Technology Use Guide for recommended weed control programs. RESPECT THE REFUGE®

Insect Resistance Management
Planting Refuges, Preserving Technology

Before opening a bag of seed, be sure to read, understand, and accept the stewardship requirements, **including applicable refuge requirements for insect resistance management,** for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.
